Fantastic, especially for the price. I would also really like to play a non-VR version of the decks from this.. I love this game! A nice, single-player game. So simple, yet so well-executed. It's a nice change from most other VR stuff! :). Relaxing solitaire in an emersive room of a mansion.. GREAT GAME MATE LOVE THE WHOLE THING BUT PLEASE TELL ME THE NAME OF THAT PIANO SONG IN THE GAME AND TRAILER?????. Fun Little title for 2 dollars. During a game, I get distracted sometimes due to some figures wondering what I'm doing. Graphics, audio, controls are above average and I recommend this for 2 dollars. The game has secrets.. MY Favorite VR solitaire game solution! So much fun and the background things just make it so much better than anyone else on the market. If you like Solitaire and have VR Buy this right now :). Waste of money, not designed for VR, have to use a game controller and not touch, I play Solitaire alot and this to me is no simple user friendly version, not even close
